

MapmyIndia™

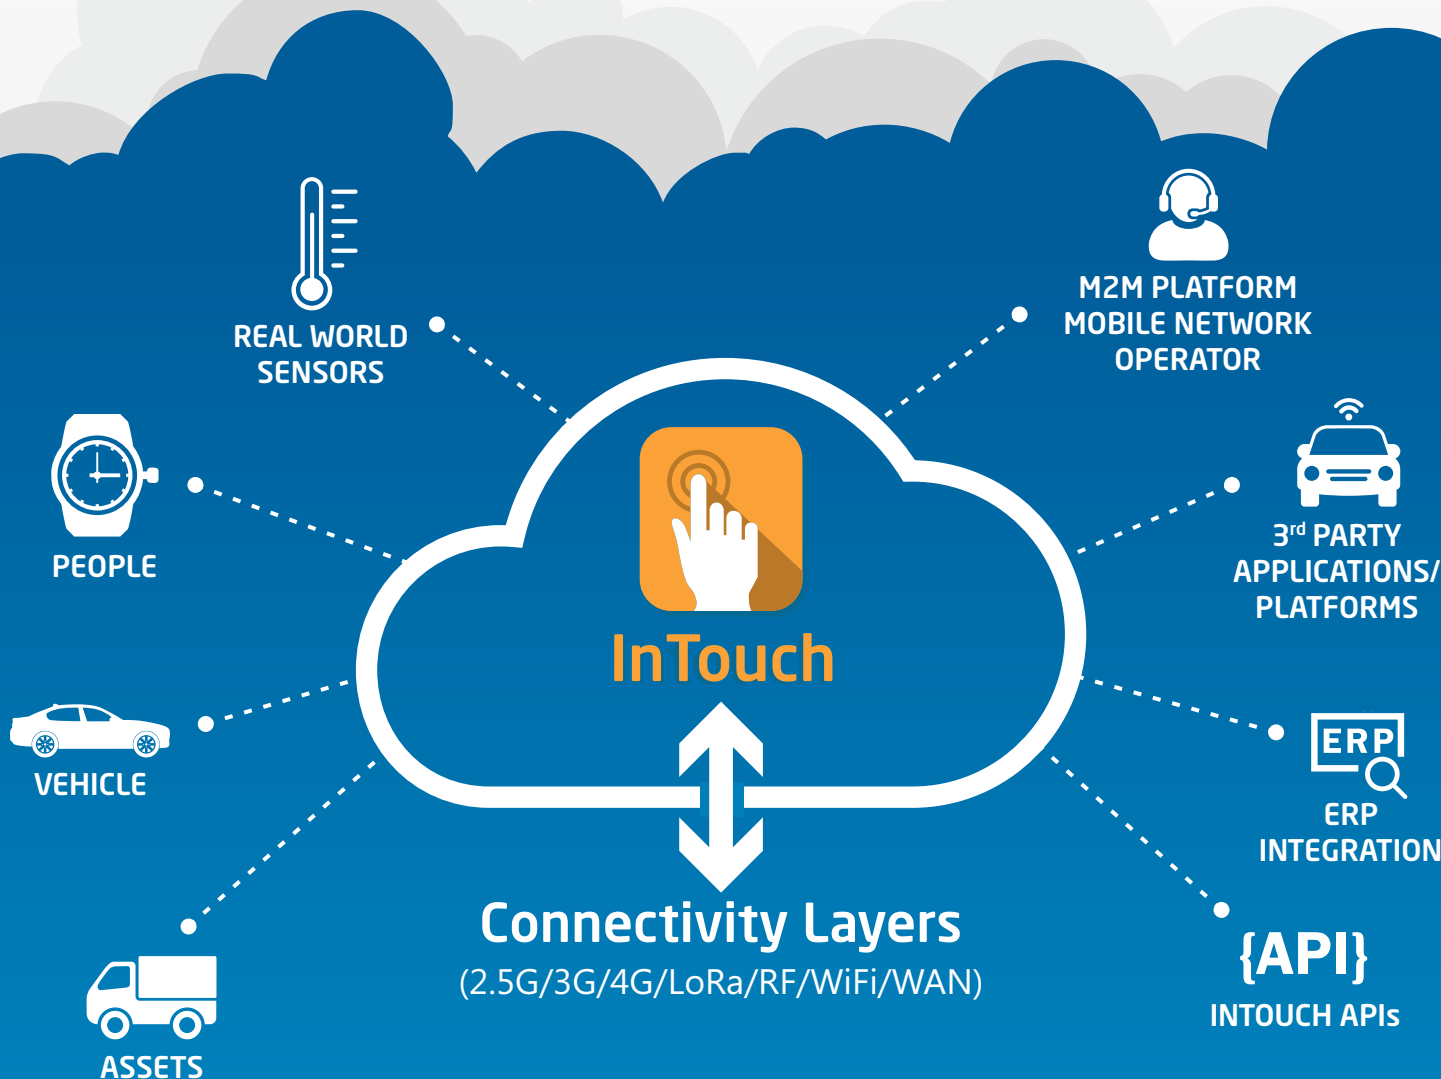

INTOUCH

Location Based IoT Platform

PRODUCT OVERVIEW

Bridging the gap between the connected devices, sensors and data networks. InTouch is a cognitive application system that gives sense to the plethora of data generated by them. It is a highly scalable, powerful and strong platform to deploy IoT applications across various industry verticals.

InTouch can be easily integrated with other platforms to manage all your fleet/asset management. The approach adapted is by optimizing and monitoring your vehicles, along with increasing your employee productivity and asset management with useful insights and maintaining comprehensive reports.

ROBUST IOT PLATFORM

MapmyIndia InTouch is a Location based IoT platform. Our tracking platforms are engineered using several years of our experience in the field of mapping, IoT based location technology like GPS/ GLONASS/ Cell-ID and location based applications.

Our strength lies in the vast experience we have, for more than two decades & catering to a diverse set of clients from different industry verticals like BPO's, ITES Companies, Long Haul/ Short Haul Logistics.

FEATURES

- Unified platform, integrated with all the major types of IoT devices
- Tightly integrated with accurate and detailed MapmyIndia map data
- Data access through the APIs is available
- Various options for Connectivity like 2.5G, 3G, 4G, LoRa, MQTT, RF are supported
- Vehicle CAN monitoring capabilities and Preventive health maintenance are offered
- Route management
- Feature rich platform with Geofence and various alerts handling capabilities
- Open architecture extends the platform for specific requirements
